

CE Electric UK Employment Opportunities

Field Operations

CE Electric UK is the power distribution business in Yorkshire and the North East, working through its subsidiaries YEDL and NEDL. We operate and maintain the electricity distribution network that delivers electricity to more than 3.7 million premises, from Northumberland to North Lincolnshire. CE Electric UK is a wholly owned subsidiary of MidAmerican Energy Holdings Company, based in Des Moines, Iowa, which is a privately owned global provider of energy services. Information on CE Electric UK and MidAmerican is available on the Internet at www.ce-electricuk.com and www.midamerican.com

Technical Services Engineer

Location: Penshaw / Keighley

Salary: £38,538 - £44,440 per annum (dependant upon experience)

The successful candidate will provide operational protection engineering support for faults, maintenance and commissioning work on protection systems

Your key responsibilities will include:

- Protection commissioning for Primary Projects, Network Construction and CEES
- Fault finding and repair on protection and SCADA systems
- Carry out protection maintenance on protection systems for Network Integrity
- Maintain and update protection related records including drawings
- Produce protection relay settings

Key Competencies will include:

- Ability to provide protection commissioning service to Primary Projects, CEES and Network Investment on protection systems up to and including 132kV
- Ability to provide protection fault finding and repair service on protection systems up to and including 132kV
- Ability to provide protection maintenance service to Network Integrity on protection systems up to and including 132kV
- Ability to maintain and update protection related records including drawings
- Ability to provide protection relay settings
- Ability to provide protection condition assessment reports on protection equipment

Qualifications & Attributes:

The successful candidate should have an HNC in electrical engineering or equivalent with previous experience working as an engineer on electrical power networks, and an aptitude for using computers and power system protection.

Having past experience of specifying power system protection designs would be desirable. Previous experience in protection commissioning at 33kV and operational experience to level of senior authorised person at 33kV or above would also be advantageous.

Closing date: 6th August 2010. Please contact ceuk.recruitment@ce-electricuk.com or 0191 229 4111 for an application form quoting reference number **FOP0037**.

Applications are invited from women and men with appropriate experience and qualifications. Applicants are considered on the basis of their suitability for the post irrespective of sex, marital status, sexual orientation, gender re-assignment, race, age or disability. CE Electric UK recruit on ability and ability alone.
